

# UI Design and Prototyping Report Template

## 1. Introduction

- A fitness blog is an easily accessible online source of motivation and guidance for everything fitness related.
- So far the features will include different pages for home, workouts, challenges, blog and about.
- The logo will be used to navigate back to the homepage.
- Content will be divided into meaningful sections and images will be used to increase the appeal of the website.
- This will help me use the bootstrap knowledge I will acquire throughout this course. So far, I can see myself using responsive design, bootstrap grids, cards, tables, media objects, alerts to make this website.

## 2. User Interface Design and Prototype

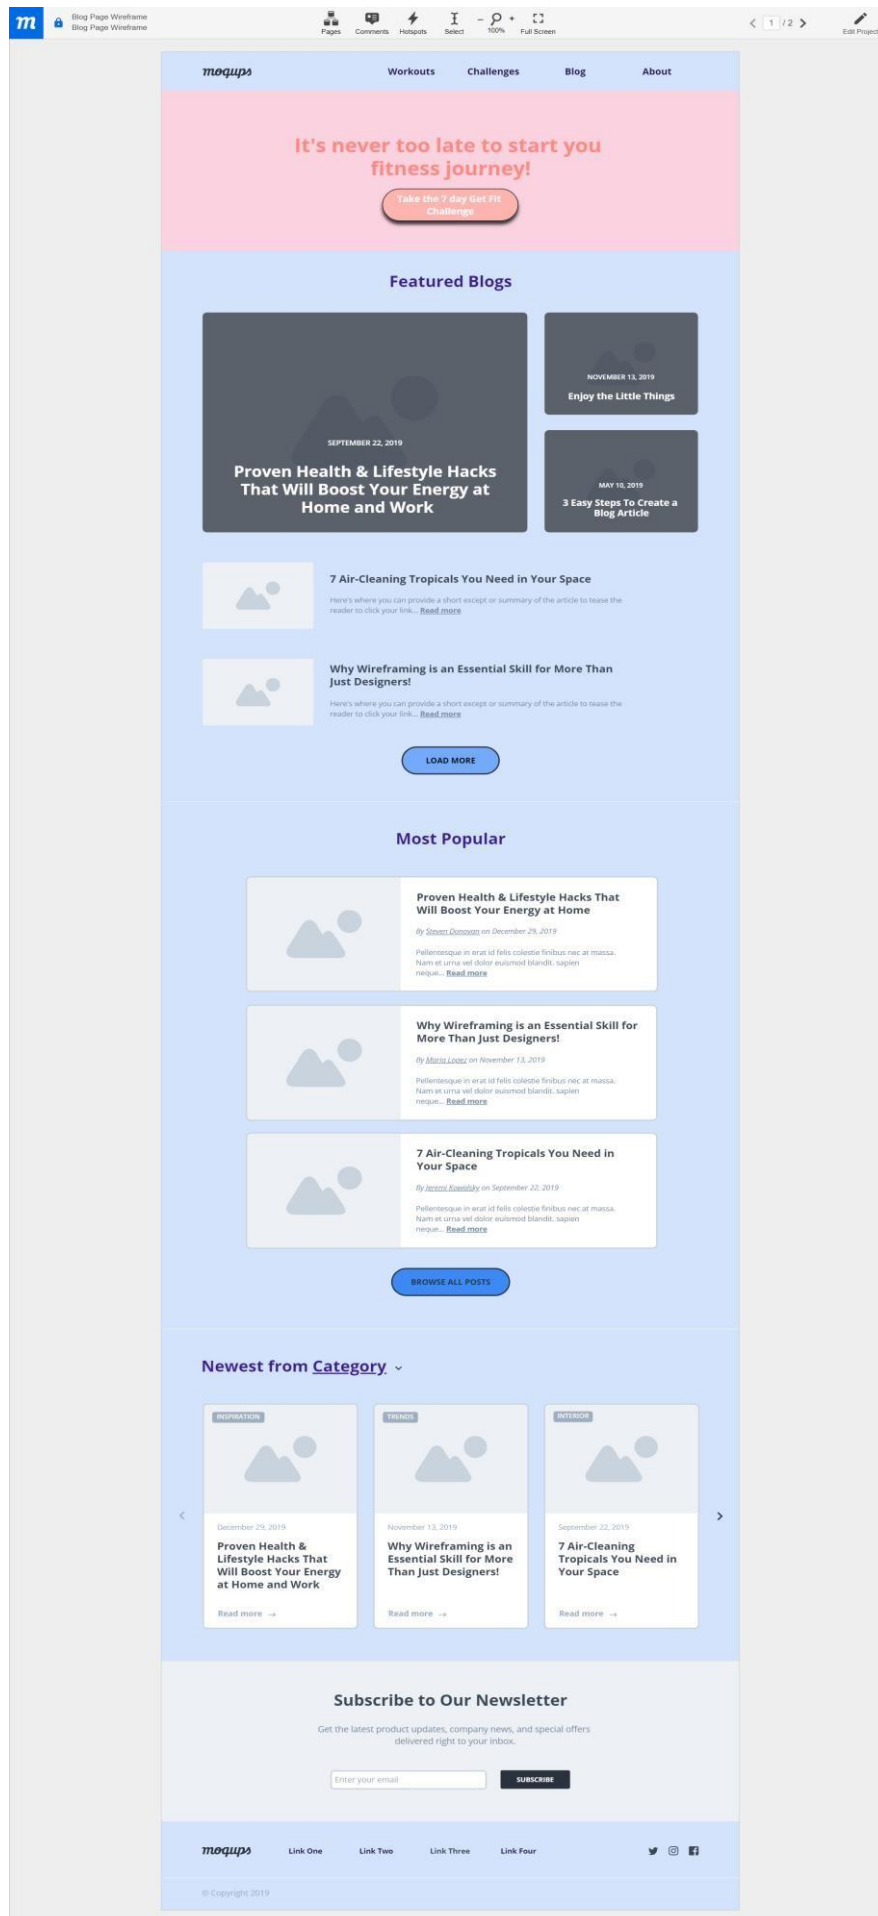

Figure 1 Homepage

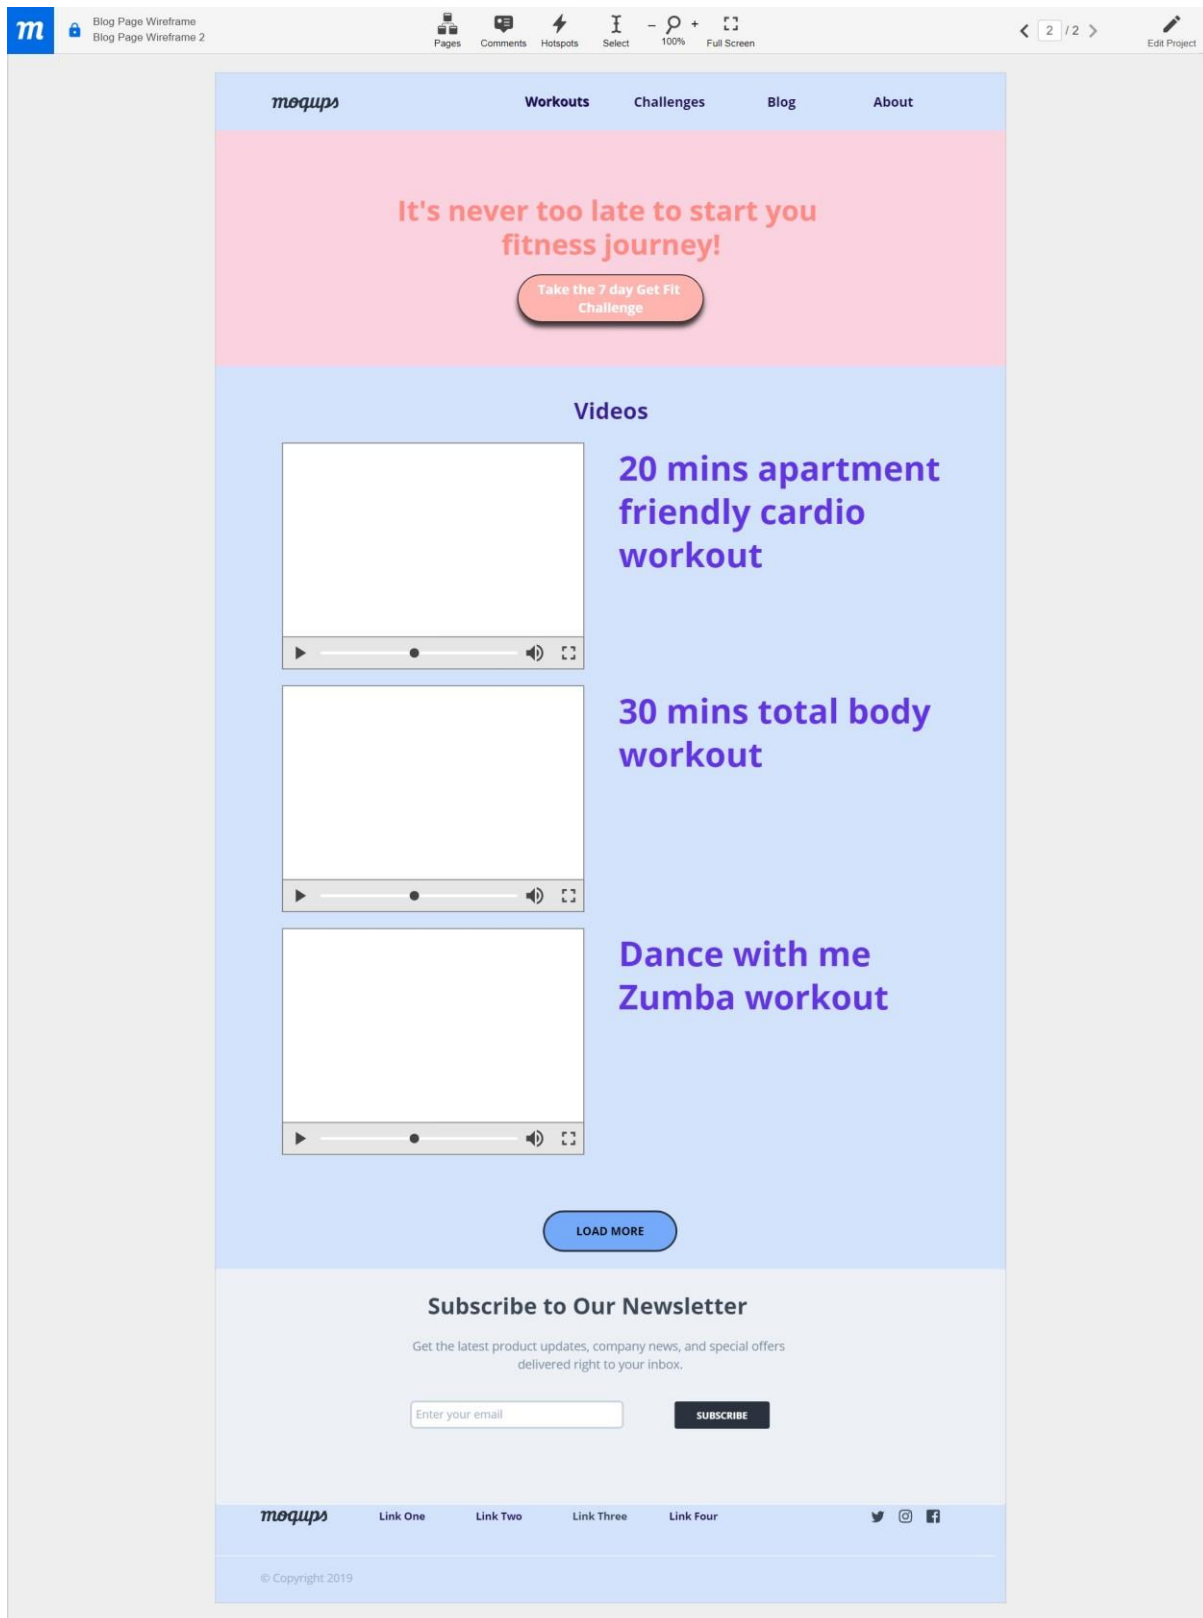

Figure 2 Workouts page

### 3. Navigation Structure

- Navigation will be facilitated by navbar, buttons, link, etc.
- Flow of application:
